

```
1  what is css?
2  CSS stands for Cascading Style Sheets.
3  It is used to style and format HTML documents – controlling the layout, colors,
4  fonts, spacing, animations, and responsiveness of a webpage.
5  HTML is like the skeleton (structure), and CSS is the skin and clothes (design).
6  things in css:
7
8  CSS allows you to style almost every aspect of a webpage. Here are the main things:
9
